NUMEROUS MILK PRICE REDUCTIONS IN JULY

Price changes in fluid milk markets this month are, almost without exception, declines under June, the favorable production situation and the lower level of butter prices which has prevailed since the first of June being factors contributing to these changes. A number of markets affected are under Federal control and licenses have been amended to provide for price reductions. Cities included in this group are San Diego, California; Lincoln, Nebraska; Tulsa, Oklahoma; Denver, Colorado, Leavenworth and Topeka, Kansas. Reductions in Class I prices vary from 11¢ at San Diego to 48¢ at Tulsa. Four Federal licenses have been cancelled recently as follows: Southern Illinois, June 25th; Los Angeles, Philadelphia, and Fort Worth, Texas, on July 1st. One other license change of interest occurred at Kansas City, whereby the sales area is restricted to Kansas City, Missouri, instead of the greater Kansas City

area which includes Kansas City, Kansas. The Federal license covering Fort Wayne, Indiana, amended on June 19th to provide for an increase of 15¢ per cwt. in the Class I price and this is the one increase reported during the month. Class I and retail price declines averaging 1¢ per quart are reported from Cleveland and Dayton, Ohio, and a similar reduction of retail prices is reported at Akron, Ohio. These markets were under the control of the Ohio Milk Commission before that body was discontinued July 1, through failure of the State Legislature to re-
new the Act. Retail prices only are 1¢ per quart lower at Evansville, Indiana. On the Pacific Coast reductions have occurred at Portland and Seattle, the Class I reductions being 9¢ and 24¢ per cwt. respectively, and the retail price change being a 1¢ per quart decline in each market.

AUGUST MILK PRICES SHOW FEW CHANGES

With the exception of Boston, where a
reduction of both Class I and retail prices
amounting to 1 cent per quart occurred on July
16, and Cleveland, where retail prices are 1
cent per quart lower than in July, there are
no price changes in major milk markets this
month from the prices which prevailed a month
ago. The Boston reduction involved an amendment
to the Federal license, insofar as the price to
producers was concerned. Retail prices, however,
are not controlled by the license. These Boston
changes were reported to have occurred because
of supplies of under-priced milk being on the
market. The Cleveland Class I price for
August is reported not yet determined.

On the Pacific Coast, reports from
Everett, Washington indicate a 1 cent per quart

reduction there on Class I and retail prices.
Incomplete information from Tampa, Florida, shows
a sharp decrease in retail prices for at least
part of the supply, amounting to 3 cents per
quart. Prior to this drop, the prevailing
retail price was 15 cents.

The few price changes this month are in
sharp contrast to the numerous advances which
took place in August last year, at which time
dairy production was suffering the effects of
the wide spread drought, and prospective
supplies of dairy feeds were light. During that
period and the ensuing fall months milk prices
generally advanced. Milk dealers' current buying
prices average about 12¢ per cwt. above August,
1934, and retail prices average from $\frac{1}{4}$ to $\frac{1}{2}$
cent per quart higher.

SEPTEMBER MILK PRICES AVERAGES SAME AS AUGUST - FEW CHANGES

Reports on September milk prices show both declines and advances, although changes are limited to a relatively few markets. The largest market affected is Chicago, where the Class I price is down 45 cents per cwt. and retail prices 1 cent per quart. Coincident with these changes the adoption is reported of a method of calculating net prices to producers on a utilization basis. Two other markets in this same general section of the country report increases. At Knoxville, Tenn., producers prices advanced 27 cents per cwt., from \$1.80 to \$2.07, and retail prices from 10 cents per quart to 12 cents. From Dayton, Ohio, reports show that Class I milk in September is to be \$1.92 per cwt., an increase of 52 cents, and that retail prices are up 1 cent per quart to 10

cents. Evansville, Indiana prices for Class I milk were reduced the equivalent of 16 cents per cwt. on August 16, and retail prices advanced 1½ cents per quart. The Federal license covering Tulsa, Okla. was amended providing for a 31 cents per cwt. increase on Class I milk August 16. Another change this month includes an advance of 17 cents per cwt. on Class I milk at Phoenix, Arizona through amendment of Federal license which was also approved on above date.

Federal licenses covering Alameda County California (Oakland, Berkeley etc.) and San Francisco were suspended during the past month, as was also the license at Savannah, Georgia.

OCTOBER FLUID MILK MARKETS GENERALLY STEADY

Reports from fluid milk markets reveal very few changes in October from the previous month, and those which occurred do not change general averages. There have been comments in the press regarding the milk strike at Chicago but as yet the Class I increase from \$1.75 per cwt. to \$2.50 demanded by certain groups has not been agreed upon. Retail prices at St. Louis are 2 cents per quart lower than those published last month, this change having become effective September 14. The Class I price under the Federal license remains at \$2.25 per cwt. At San Francisco the price for Class I milk set by the local Milk Board in accordance with the new State law, and effective October 7, is now 62 cents per pound of butterfat, (\$2.17 per cwt. for 3.5 percent

milk) instead of 55 cents. Class I prices are slightly lower than in September at Indianapolis and at Pueblo, Colorado, but at Winona, Minn., declines of 83 cents per cwt. on Class I and 2 cents per quart on retail milk are in effect. Increases are reported from two Southern cities, 40 cents per cwt. at Greensboro, N.C., and 10 to 35 cents per cwt. at Birmingham, Ala. At another Southern city, Miami, Florida, however, some of the local supply is reported as being bought this month at 70 cents less per cwt. than in September.

Dairy markets generally are in a fairly firm position. Stocks of dairy products are heavy, but changes in production trends since the flush season, and some buying by the Government for relief distribution, have lent support.

TOPE OF MOST FLUID MILK MARKETS FIRM IN NOVEMBER

Fluid milk markets continue to show relatively few price changes, according to reports received by the Bureau of Agricultural Economics. An entirely new price plan has been adopted in the Chicago area, based upon condensery prices. The November price to producers will be 50 cents per cwt. over the condensery price on all milk delivered up to 90 percent of established bases, the condensery price being that established under the evaporated milk marketing agreement and based upon current butter and cheese prices. This price cannot be calculated until the close of the month. The Cleveland, Ohio price for Class I milk this month is \$2.00 per cwt., whereas in October a flat price of \$1.50 per cwt. for all milk was reported. These prices may not apply to all of the supply, as no uniform plan appears to have been developed since Ohio State control was discontinued several months ago. Cleveland retail prices have advanced 1 cent per quart. The San Francisco price is reported back at 55 cents per pound of butterfat (\$1.92 per cwt. for 3.5 per milk), pending court action

following an injunction against the State Control Board. The Tulsa, Oklahoma federal license was suspended October 16, and a range of prices from \$1.96 to \$2.17 per cwt. is in effect this month. Other scattered markets show the following changes: Miami, Fla., price to producers up 35 cents per cwt. for part of the supply; Huntington, W.Va., a Class I price of \$1.95-\$2.05 per cwt. instead of a range of \$1.78-1.98 in October; Wausau, Wis., and Seattle, Wash., advances of 11 cents and 21 cents per cwt. respectively in producers' prices for Class I milk; Lawrence, Lowell and Springfield, secondary markets in the Boston area, show reductions of 11 to 13 cents per cwt. on Class I milk, but are still above the Boston F.O.B. price; Manchester, N.H. has advanced 11 cents per cwt. and is now the same as Boston.

The general tone of dairy markets is firmer. Butter and cheese prices are higher than a month ago. Production declines are reported, and milk and cream supplies in several important markets are shorter than for some time.

MILK MARKETS FIRM - LESS SURPLUS MILK

Reduced production and fairly good demand
have lent support to December fluid milk markets.
Supplies of milk have been ample for local re-
quirements, and apparently no serious shortages
have developed, but what has happened is that
surpluses have been cut down. While basic fluid
milk prices are for the most part the same as in
November, less milk will go into surplus classi-
fications, and higher net returns to fluid milk
producers for current production should result
when December prices are finally figured.

In only a few markets are December basic
prices higher than in November, and these
changes for the most part are not great. Reports
from San Francisco show that a 35 cents per cwt.
increase on Class I milk and a 1 cent per quart
retail price advance are in effect. The Twin
Cities Class I price has been \$1.85 instead of

\$1.75 since November 16, and an increase of 7
cents per cwt. was effective at Lincoln, Nebraska
on the same date. Class I milk is 14 cents per
cwt. higher than a month ago at Seattle, 22 cents
higher at Lynn, Mass., and 21 cents higher at
Lexington, Ky., and at Lexington, part of the
local supply is being retailed at a 1 cent per
quart increase. Chicago retail prices went from
10 to 11 cents per quart on December 9, and an
increase in the December Class I price will
result if butter and cheese prices average above
November. A plan somewhat similar to the new
Chicago plan is being given consideration at
Indianapolis, although no approval has been
announced by the State Milk Control Board. Tampa,
Florida reports show a retail price increase of
1 cent per quart, and slight increases in dealers'
buying prices are effective at Evansville, Ind.,
